ViewSonic® Wireless Presentation Displays help to deliver faster and more efficient meetings.
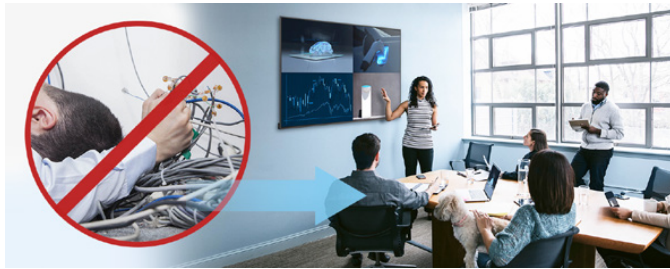

No messy wires

Equipped with built-in features for wireless connectivity, screen sharing, and an integrated multimedia display.

Fuss free set up

It's easy to set up for meetings and presentations. Content-sharing is easy and intuitive, removing many of the common barriers to effective collaboration.

Easy remote management & maintenance for IT

Intranet/Internet-Based Settings & Content Management vController, SureMDM, Revel Digital. Remotely control or manage a fleet of ViewSonic Wireless Presentation Display's from the cloud using ViewSonic software solutions or via RS232/LAN.

With stunning 4K Ultra HD resolution, high brightness, wide viewing angles, and dual speakers, ViewSonic® Wireless Presentation Displays* help create faster and more efficient meetings in any conference room, boardroom, or huddle space.

And with ViewBoard® Cast content sharing software, employees can easily stream wireless content from their devices directly to the display.

Whether your employees are in a meeting, a different office, or across the globe, enjoy collaborative productivity with ViewSonic Wireless Presentation Displays.
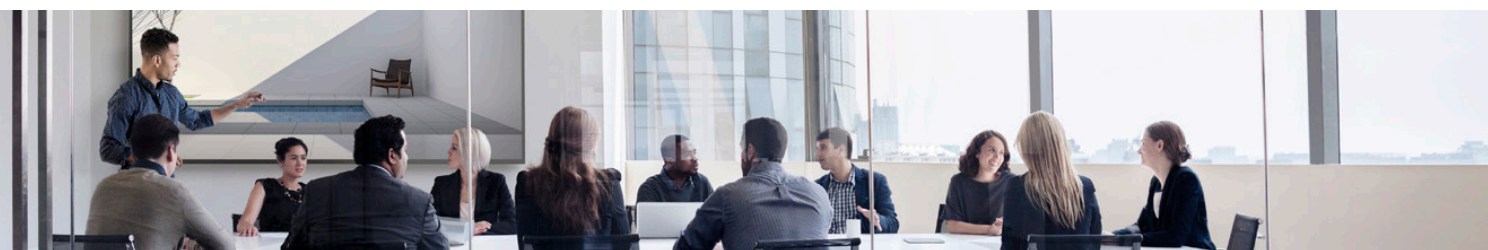

PRODUCTIVITY STARTS HERE

ViewSonic Wireless Presentation Displays are packed with features that are sure to transform any meeting space into a dynamic communications hub. Experience easy installation, seamless content casting, remote management and so much more with this powerful, all-in-one Wireless Presentation Display solution.

ViewSonic Workplace: Supports wireless cloud service access and PC control. Works with cloud-based apps for Android® such as Zoom™, Microsoft Teams®, Microsoft 365® and other compatible productivity apps.

Easy Content Sharing: ViewBoard® Cast content sharing software enables content streaming from multiple mobile devices to the display over wireless or cable networks.

Cross-platform streaming: Enjoy wireless screen sharing and presentations across multiple device platforms, simultaneously.

All-in-one solution: Embedded SoC smart platform with integrated USB and HTML5 browser enables local or remote multimedia playback in stunning 4K Ultra HD resolution.

Simple Remote Management: Experience simple remote management with Crestron®, Extron, AMX, or other ProAV control systems.

VIEWSONIC VIRTUAL WORKPLACE

ViewSonic Virtual workplace enables users to create a new hypermodern, secure, connected workplace. Users can enjoy remote access to PCs, enhanced wireless connectivity, and access to web-based cloud services.

Save Time and Money

No more having to rely on error-prone public meeting room PCs. Wirelessly cast your personal devices to the WPD with a few clicks and start sharing your content - without the need to pay for additional hardware.

Productivity and Collaboration

Securely cast to your display and start working seamlessly with documents in the cloud without having to worry about PC issues delaying your meeting.

Superior Security

All displays can be securely managed with myViewBoard Device Management and can be remotely monitored, tracked, grouped, or wiped.
