

In-Wall Access Point

GWN7624

The GWN7624 is an in-wall Wi-Fi access point designed for small-to-medium sized businesses, offices, residential and commercial locations, hotels and more. It provides three Gigabit network ports to provide IP phones, IPTV, computers and similar devices with Ethernet while also providing and uplink Gigabit network port with PoE/PoE+. The GWN7624 offers 2.4G 2×2:2, 5G 4×4:4 MU-MIMO technology and a sophisticated antenna design for maximum network throughput and expanded Wi-Fi coverage range. This access point is designed to be mounted in-wall to provide a clean and professional installation that blends into the surrounding environment. To ensure easy installation and management, the GWN7624 uses a controller-less distributed network management design in which the controller is embedded within the product's web user interface. The GWN7624 is also supported by GWN.Cloud and GWN Manager, Grandstream's free cloud and on-premise Wi-Fi management platform. It is the ideal Wi-Fi AP for voice-over-Wi-Fi deployments and offers a seamless connection with Grandstream's Wi-Fi capable IP phones. With support for advanced QoS, low-latency real-time applications, mesh networks, captive portals and 200 concurrent clients per AP, the GWN7624 is an ideal Wi-Fi access point for medium wireless network deployments with medium user density.

2.03 Gbps wireless throughput and 4x Gigabit wireline ports

5GHz 4×4:4 MU-MIMO

Supports up to 200 concurrent Wi-Fi client devices

Advanced QoS to ensure real-time performance of low-latency applications

Anti-hacking secure boot and critical data/control lockdown via digital signatures, unique security certificate/random default password per device

Self power adaptation upon auto detection of PoE or PoE+

Embedded controller manages up to 30 local GWN APs; GWN.Cloud offers unlimited AP management, & GWN Manager offers on-premise software AP management
